8. Coba buat `Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b)` dan akses `/hitung/10/25`

The screenshot shows a code editor with four tabs: `.env`, `DashboardController.php`, `web.php`, and `tentang.blade.php`. The `web.php` tab is active, showing the following code:

```
9
10 Route::get('/dashboard', [DashboardController::class, 'index']);
11 Route::get('/hitung/{a}/{b}', function ($a, $b) {
12     return $a + $b;

Below the code editor is a browser window showing the URL `127.0.0.1:8000/hitung/10/25`. The browser window is partially visible, showing the address bar and the beginning of the page content.
