

LAPORAN TUGAS PEMROGRAMAN BERBASIS WEB

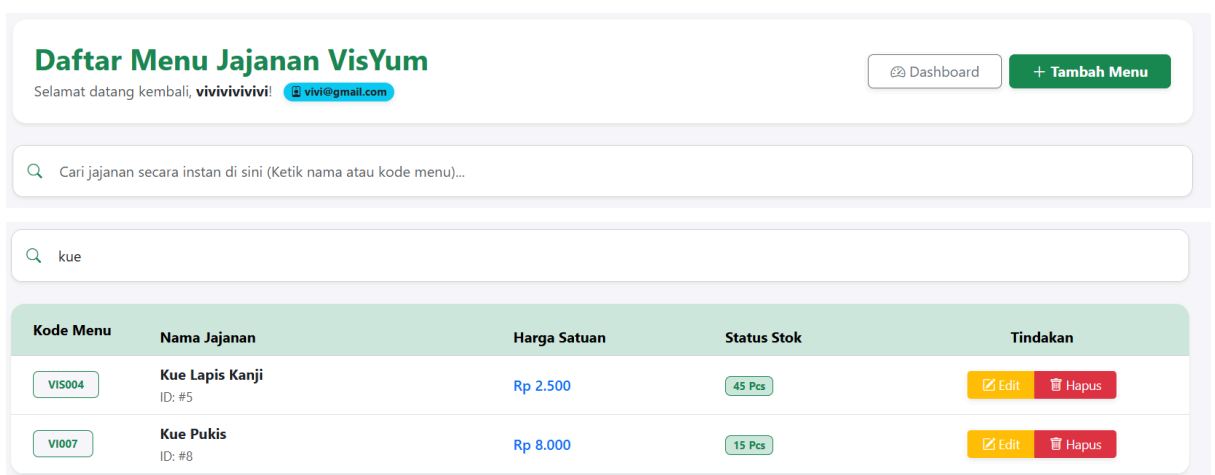

P1

NAMA : ADINE VIVIA
NIM : 242410101083
KELAS : PWEB A

1. Buat section yang menampilkan data cuaca kota Surabaya menggunakan API publik <https://wttr.in/Surabaya?format=j1> (gratis, tidak perlu API key). Tampilkan: nama kota, suhu saat ini (dalam °C), dan deskripsi cuaca. Gunakan async/await dan tampilkan loading indicator saat data sedang diambil.

2. Buat live search yang memiliki form sederhana untuk mencari mahasiswa. Form dikirim via AJAX POST/ GET ke Laravel — halaman tidak boleh reload sama sekali. Setelah berhasil, catatan baru langsung muncul di daftar bawah tanpa refresh. Gunakan CSRF token yang benar.

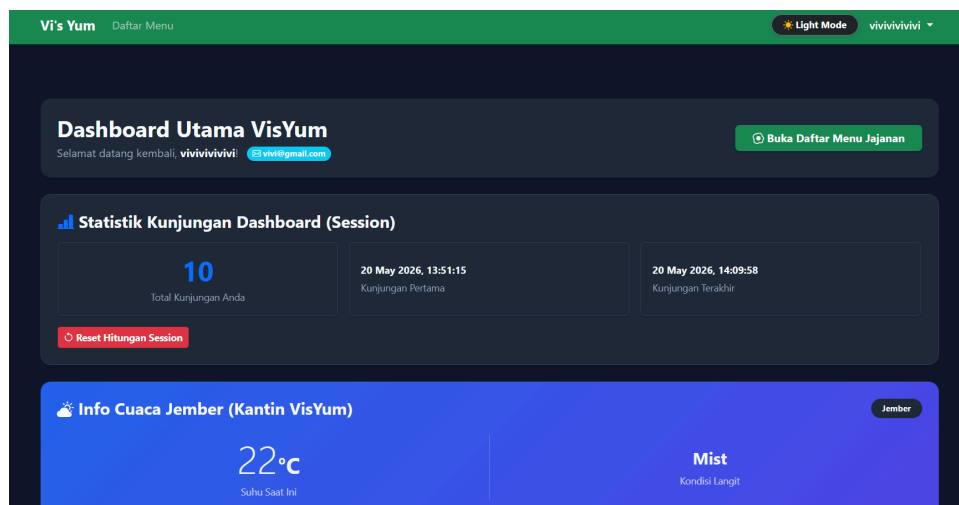

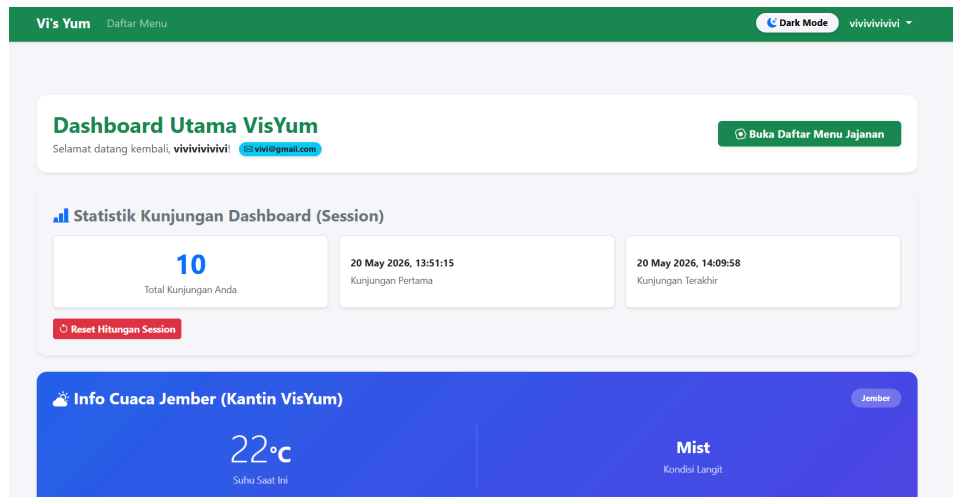

3. Buat navbar untuk mengeset dark mode.
 - a. Tambahkan dark mode ke konfigurasi Tailwind (darkMode: 'class' di tailwind.config.js)

```

175     if (toggleBtn) {
176         toggleBtn.addEventListener('click', function() {
177             const isDarkActive = document.documentElement.classList.contains('dark-mode');
178
179             if (isDarkActive) {
180                 // Copot mode malam, pasang mode terang
181                 document.documentElement.classList.remove('dark-mode');
182                 setCookie('theme', 'light', 7);
183                 updateButtonUI('light');
184             } else {
185                 // Nyalakan mode malam
186                 document.documentElement.classList.add('dark-mode');
187                 setCookie('theme', 'dark', 7);
188                 updateButtonUI('dark');
189             }
190         });

```

- Buat helper function JavaScript: setCookie, getCookie, deleteCookie
- Implementasikan toggle dark mode: klik tombol → toggle class 'dark' di HTML → simpan ke cookie
- Terapkan cookie di awal load (dalam tag script di <head>) untuk mencegah flash of unstyled content

(screenshot b-d)

```

<script>
    // Fungsi menyimpan data ke Cookie browser
    function setCookie(name, value, days) {
        let expires = "";
        if (days) {
            let date = new Date();
            date.setTime(date.getTime() + (days * 24 * 60 * 60 * 1000));
            expires = "; expires=" + date.toUTCString();
        }
        document.cookie = name + "=" + (value || "") + expires + "; path=/";
    }

    // Fungsi mengambil data dari Cookie browser
    function getCookie(name) {
        let nameEQ = name + "=";
        let ca = document.cookie.split(';');
        for (let i = 0; i < ca.length; i++) {
            let c = ca[i];
            while (c.charAt(0) == ' ') c = c.substring(1, c.length);
            if (c.indexOf(nameEQ) == 0) return c.substring(nameEQ.length, c.length);
        }
        return null;
    }

    // Fungsi menghapus data dari Cookie browser
    function deleteCookie(name) {
        document.cookie = name + '=; Path=/; Expires=Thu, 01 Jan 1970 00:00:01 GMT;';
    }

    // Balaskan pengecekan cookie di awal load (Anti-flash unstyled content)
    const savedTheme = getCookie('theme') || 'light';
    if (savedTheme === 'dark') {
        document.documentElement.classList.add('dark-mode');
    }
}
</script>

```

- e. Buat halaman pengaturan /preferensi dengan form: pilihan tema (light/dark/system), pilihan ukuran font
- f. Simpan form ke cookie via Fetch POST ke endpoint Laravel

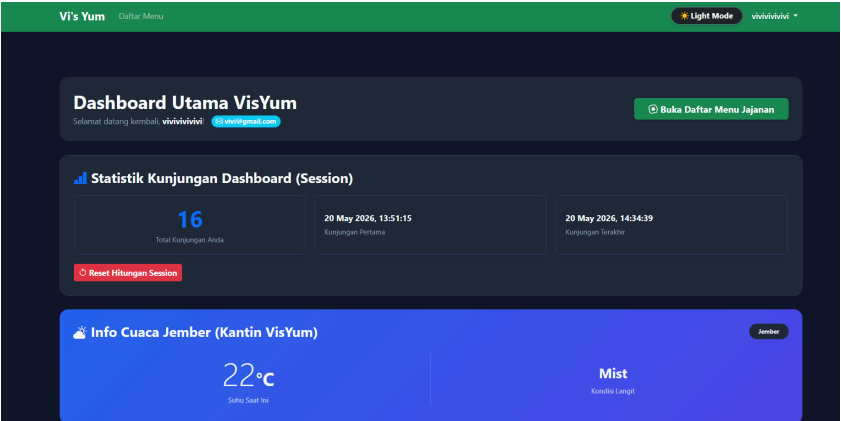

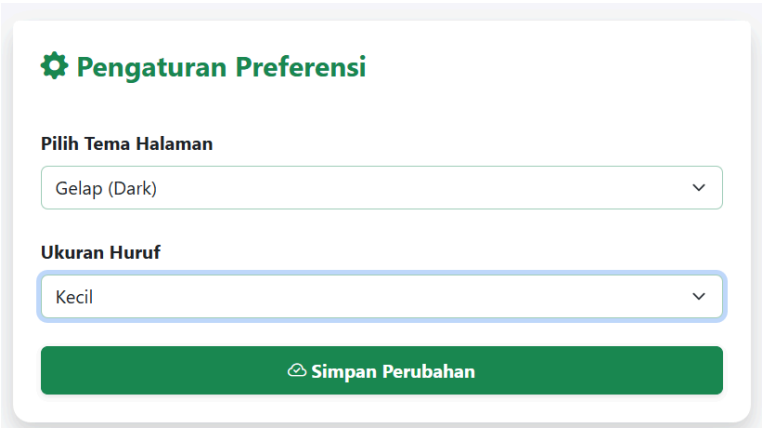

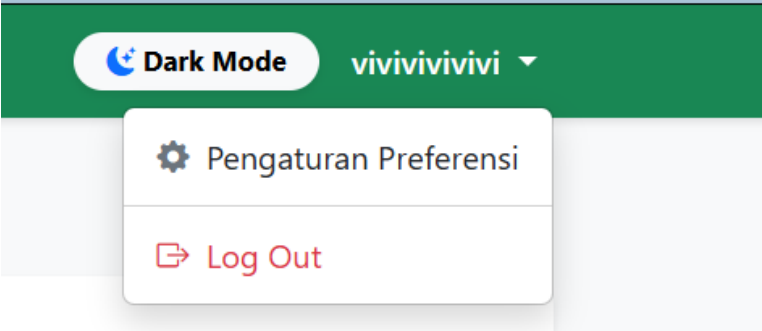

(screenshot e dan f)

```

- g. Laravel Controller: baca cookie dari `$request->cookie()`, kembalikan JSON konfirmasi

```
index.blade.php SettingsController.php X web.php Vi's Yum MenuController.php
app > Http > Controllers > SettingsController.php
1 <?php
2
3 namespace App\Http\Controllers;
4
5 use Illuminate\Http\Request;
6 use Illuminate\Support\Facades\Cookie;
7
8 class SettingsController extends Controller
9 {
10     public function index()
11     {
12         return view('settings.index');
13     }
14
15     public function update(Request $request)
16     {
17         $theme = $request->input('theme', 'light');
18         $fontSize = $request->input('font_size', 'medium');
19
20         return response()->json([
21             'success' => true,
22             'message' => 'Preferensi berhasil disimpan!',
23             'data' => [
24                 'theme' => $theme,
25                 'font_size' => $fontSize
26             ]
27         ]);
28     }
29 }
```

4. Buat section yang menghitung berapa kali pengguna mengunjungi halaman tersebut menggunakan session Laravel. Tampilkan: jumlah kunjungan, waktu kunjungan pertama, dan waktu kunjungan terakhir. Sediakan tombol "Reset Hitungan" yang menghapus data dari session dan mengulang dari awal.

```
index.blade.php .../menu index.blade.php .../settings MenuController.php X SettingsController.php
app > Http > Controllers > MenuController.php
1 namespace App\Http\Controllers;
2
3 use App\Models\Menu;
4 use Illuminate\Http\Request;
5
6 class MenuController extends Controller
7 {
8     public function index()
9     {
10         // Tetap mempertahankan pagination bawaan webmu
11         $menus = Menu::latest()->paginate(10);
12
13         // 1. Tambah jumlah hitungan kunjungan (setiap kali halaman di-load)
14         $kunjungan = session('jumlah_kunjungan', 0) + 1;
15         session(['jumlah_kunjungan' => $kunjungan]);
16
17         // Atur zona waktu ke Asia/Jakarta agar catatan jam praktikum akurat
18         date_default_timezone_set('Asia/Jakarta');
19         $waktuSekarang = date('Y-m-d H:i:s');
20
21         // 2. Catat Waktu Kunjungan Pertama kali (hanya diisi sekali di awal session)
22         if (!session()->has('kunjungan_pertama')) {
23             session(['kunjungan_pertama' => $waktuSekarang]);
24         }
25
26         // 3. Perbarui Waktu Kunjungan Terakhir (selalu berubah setiap kali load)
27         session(['kunjungan_terakhir' => $waktuSekarang]);
28
29         return view('menu.index', compact('menus'));
30     }
31 }
32 }
```

```

1 <?php
2
3 use App\Http\Controllers\ProfileController;
